

**Aluminium Oxide** 

1. Identification of the substance / Preparation and Company:

Identification of the substance or preparation:

Commercial product name: Aluminium Oxide

Company / Manufacturer: ERNST HINRICHS Dental GmbH

Borsigstr. 1 D - 38644 Goslar 0 53 21 / 5 06 24 0 53 21 / 5 08 81

info@hinrichs-dental.de / www.hinrichs-dental.de

2. Hazards identification

2.1 Classification: Not applicable.

2.2 Label elements: Does not require labelling under the CLP Regulation (EC) No.

1272/2008. But please take note of this product information.

No risk of silicosis during application.

Safety instructions: Possible dust exposure due to fine dust particles.

2.3 Other hazards: Not known.

### 3. Composition/information on ingredients

Ingredients	HK	HK	EK	EK micro (Mean	EKR
	(Mean values)	(Mean values)	(Mean values)	values)	(Mean values)
Aluminium oxide	95.65%	95.77%	99. 73%	99.69%	99.30%
(Al <sub>2</sub> O <sub>3</sub> )					
Titanium dioxide (Ti0 <sub>2</sub> )	2.42%	2.79%	-/-	-/-	-/-

Chemical characterisation	EINECS	CAS No.	(1) REACH Registration No. (2) CLP Notification No	Classification according to CLP Regulation (EC) No. 1272/ 2008	
				Hazard classes Hazard categories	Hazard statements
Aluminium oxide (AbOi)	215-691-6	1344-28-1	1) 01-2119529248 -35-0010 (2) 02 -2119709295-38-0000	-/-	-/-
Titanium dioxide (Ti0 <sub>2</sub> )	236-675-5	13463-67-7	(2) 02-2119879066 -28-0000	-/-	-/-

Substances listed on the so-called 'Candidate List of Substances of Very High Concern (SVHC) for authorisation' of the European Chemicals Agency (ECHA) are not intentional ingredients of this product. It is therefore not to be expected that those substances are present in quantities of > 0.1% in the product.

Hazardous substances:

No dangerous ingredients.

Substances with prescribe EC exposure

Does not contain substances with EC exposure limits.

limits:

### 4. First aid measures

Please also take note of sections 8 and 16 of this product information.

4.1 Description of first aid measures:

General information: Consult a doctor in case of health disorders.

After inhalation: Provide the affected person with fresh air. Consult a doctor in

case of irritation in of the respiratory tract.

According to the REACH Regulation (EC) No. 1907/2006

Date of issue: 17.11.2015

**Aluminium Oxide** 

Remove contact lenses and rinse the eyes with open eyelids After eye contact:

for 10 minutes under running water.

If necessary, consult an ophthalmologist.

Wash with water and rinse. After skin contact:

Rinse mouth and drink plenty of water. Do not induce After swallowing

Not known.

vomiting. If you feel unwell, seek medical advice.

Printing date: 11.01.2016

4.2 Most important symptoms and effects, both

acute and delayed:

4.3 Indication of any immediate medical

attention an special treatment needed:

Treat symptomatically.

Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Product does not burn. Match extinguishing measures to

Not known.

ambient situation.

Unsuitable extinguishing media:

Special hazards arising from the product:

5.2 Not known.

Advice for fire fighters: 5.3 Match the firefighting measures to the environmental

conditions. Not known.

Additional information:

Accidental release measures

6.1 Personal precautions: Avoid dust formation.

6.2 Environmental protection measures: Not known.

6.3 Methods and materials for containment and Pick up mechanically and dispose of properly.

cleaning up:

6.4 Reference to other sections: Refer to protective measures in section 7 and 8.

Additional information: Not known.

Handling and storage

Precautions for safe handling:

Information on safe handling: Avoid dust information.

Information on fire and explosion No special fire protection measure

protection:

Additional information: Not known.

7.2 Conditions for safe storage, including any incompatibilities

> Information on storage conditions: Requirements for storage rooms and

containers:

Always store product in dry conditions.

No special requirements needed.

Storage class VCI: LGK 13 (non-combustible solids)

7.3 Specific end uses: Aluminium oxide is used to manufacture or to use as blasting

or abrasive medium.

Limitation and monitoring of exposure/ personal protective equipment

8.1 Control parameters

Occupational exposure limit values in the workplace and / or biological limit values

Occupational Exposure Limits (OEL) in Germany for dusts

Inhalable fraction (E) 10 mg/m<sup>2</sup> Respirable fraction (A) 1,25 mg/m<sup>3</sup>

With exceeding factor 2 each, re. TRGS 900

Community exposure limits Country specific. Pleas inquire in individual cases.

Limitation and monitoring of exposure 8.2

According to the REACH Regulation (EC) No. 1907/2006

Date of issue: 17.11.2015 **Aluminium Oxide** 

Printing date: 11.01.2016

### Appropriate engineering controls:

Technical measures and the application of suitable work processes have priority over the use of personal protective equipment.

Provide adequate ventilation. This can be achieved by local suction or general extraction. Aluminium oxide is not a hazardous substance, thus only the general dust limit value applies. Suitable assessment methods to verify the effectiveness of the protective measures taken include metrological and non-metrological determination methods as described in the Technical Rules for Hazardous Substances (TRGS) 4032 and BS EN 14042 "workplace areas, Guidelines for the implementation and application of processes for assessment of exposure to chemical and biological agents".

Personal protective equipment: The use of personal protective equipment is dependent on

the concentrations and quantity of hazardous substances in

their execution in specific workplaces.

Respiratory protection: Normally, no personal respiratory protective equipment is

necessary. In case of insufficient ventilation or exceeded workplace limits, a protective breathing mask should be worn

(FFP filtering half mask depending on the existing

concentration).

Hand protection: Glove material: Leather

Eye protection: Tight-sealing protective eyewear (dust-protection goggles) in

accordance with EN 166:2001.

Body protection: With normal use, no body protection by half or full-body

coverall and boots is required.

Information on industrial hygiene: Minimum standards for protective measures when handling

working materials are listed in TRGS 500.

Do not eat, drink, smoke or take drugs while using this product. Avoid contact with skin, eyes and clothing. Remove soiled or soaked clothing immediately. Wash hands before breaks and at end of work.

Protect skin by using skin creams.

Environmental protection measures: See sections 6 and 7; no further action is required.

## 9. Physical and chemical characteristics

# 9.1 Information on basics physical and chemical properties

Appearance

Appearance: angular Physical state: solid

Colour: white / pink / brown

Odour: odourless

Safety data:

Explosion hazard: The product itself is not explosive; however, formation of

explosive air/dust mixtures is possible

Lower explosion limit: not known
Upper explosion limit: not known
Vapour pressure: not relevant

Specific gravity: approx. 3.9 to 4.1 g/cm<sup>3</sup>

Flow time:

Water solubility:

pH value:

Boiling point/range:

not relevant
insoluble in water
not applicable
not applicable

Flash point: not determined as product is not flammable

Melting point: approx. 2 000 °C

Ignition temperature: not determined as product is not flammable

According to the REACH Regulation (EC) No. 1907/2006

Date of issue: 17.11.2015

Printing date: 11.01.2016

## Aluminium Oxide

The information about the explosion limits refers to	o Aluminium oxide.	. Please refer	to the technical data
sheet for other physical and chemical data.			

9.2 Other information: None.

10.	Stability	an read	ctivity

	Clability all roughting	
10.1	Reactivity:	Aluminium oxide is non-reactive and does not chance with
10.2	Chemical stability:	proper handling and storage.  Aluminium oxide is chemically stable and does not change with proper handling and storage.
10.3	Possibility of hazardous reactions:	No hazardous reactions known.
10.4	Conditions to avoid:	No decomposition if used according to specifications.
10.5	Incompatible materials:	No hazardous reactions known.
10.6	Hazardous decomposition products:	No known hazardous decomposition products.

### **Toxicological information**

11.1	Information on toxicological effects:	According to current IFA reports the product contains
		silicosis-inducing, toxic and carcinogenic components. The
		indications given in section 8 of this product information must
		be observed.

Acute toxicity: No data on the product available. No data on the product available. Irritation: Corrosivity: No data on the product available. Sensitisation: No data the product available.

Repeated dose toxicity: No known toxicity of Aluminium oxide.

CMR effects (carcinogenic, mutagenic and No carcinogenic effect according to IFA reports. toxic to reproduction):

Summarised evaluation of the CMR No known CMR properties. properties:

Practical experience ( relevant for No data on the product available. classification and other observations):

Carcinogenicity: No known carcinogenicity of Aluminium oxide. Mutagenicity: No data on the product available.

Reproductive toxicity: No data on the product available.

Other information: Not known.

#### **Environmental information** 12.

12.1

12.3

2.1	Toxicity:	No known effects.
	Ecotoxicity:	For Aluminium oxide no environmental problems are to be

expected when handled and used properly.

Fish toxicity: Harmful effects for aquatic organisms are not expected. Aquatic invertebrates: Harmful effects for aquatic organisms are not expected.

Water plants: Harmful effects for aquatic organisms are not expected.

12.2 Persistence and degradability: Based on current experience, this product is inert and not degradable.

Bioaccumulation potential: No data available. Accumulation in biological materials is

rather unlikely, as it is inert and insoluble.

12.4 Mobility in soil: Potential not known.

Results of PBT and vPvB assessment: Not relevant. The substances in this product do not meet the 12.5

criteria for classification as PBT or vPvB.

Other harmful effects: 12.6 Not known.

According to the REACH Regulation (EC) No. 1907/2006

Date of issue: 17.11.2015 Aluminium Oxide

Printing date: 11.01.2016

#### 13. **Disposal considerations**

13.1 Waste treatment methods:

> Product: Aluminium oxide. If recycling is not possible, waste must be

disposed of in compliance with national and local regulations.

Confirm the exact waste code with the disposer.

Waste Code according to European Waste

Catalogue (EWC):

12 01 17 waste blasting material other than those mentioned

in 12 01 16.

13.2 Packaging:

> Contaminates packaging: Cleaned packaging:

National and local regulations must be followed.

Packaging can be reused after being cleaned or recycled. Packaging can be reused after being cleaned or recycled.

#### **Transport information** 14.

Aluminium oxide is no dangerous good.

# Regulatory information

15.1 Safety, health and environmental regulations / legislation specific for the product.

EU regulations: Not known.

National regulations:

Water hazard class: Not hazardous to water, classification according to VwVwS,

Annex 4.

Technical instruction on air quality (TA-

Luft):

Substances not mentioned by name.

Hazardous Incident Ordinance (12. BlmSchV [German Federal Immission

Control Regulation]):

Substance not mentioned by name.

Solvents Ordinance (31. BlmSchV [German

Federal Immission Control Regulation]):

Chemicals Prohibition Ordinance:

Relevant Technical Rules for Hazardous

Substances not mentioned by name.

Substances not mentioned by name.

Contains no hazardous substances.

Substances:

**Employment Restrictions:** 

Not known.

Miscellaneous: Aluminium oxide is not subject to the VOC Regulation. International regulations:

All Aluminium oxide ingredients are listed with TSCA, AICS, DSL (NDSL), NEPA and PICCS and registered with MITI /

ENCS under 1-23.

15.2 Chemical safety assessment: Not relevant.

#### Other information 16.

Further applicable EC directives:

Not known.

Restrictions on use recommended by the

For industrial applicate only.

manufacturer:

#### Other Information:

The product information in this documentation is correct to the best of our knowledge at the time of printing. The information is intended to provide you with advice on the safe handling of the product mentioned in this product information for storage, processing, transport and disposal. The information cannot be applied to other products. If the product mentioned in this documentation is in anyway tampered with i.e. mixed with other materials, processed or undergoes processing, the information as supplied in this document no longer applies to the new product unless expressly stated otherwise.
